

CFA series – Singlemode Adaptor Type (Female/Female) Attenuators

Description:

The adaptor type singlemode attenuators are used directly on the ends of fiberoptic jumpers prior to installation in adapters. These attenuators provide a fixed level of attenuation and feature excellent return loss. Low wavelength dependency determines them for using in WDM and DWDM transmission systems. The CFA series attenuators are available in UPC or APC polish for SC, FC connectors and UPC for ST connectors.

Features:

- Precise attenuation
- Return loss:
 - UPC 50 dB
 - APC 60 dB
- Low ripple broadband design for operation at wavelength 1250 to 1650 nm
- Attenuation range 1, 5, 10, 15, 20 and 30 dB
- High power endurance

Application:

- Fiberoptic systems
- Receiver padding for optical receiver protection
- Optical power equalization
- Linearity and dynamic range testing in laboratory equipment
